

IFC Preview

Plugin for BIM Vision

Thank you for choosing IFC Preview plugin. This plugin generates and shows system preview of IFC files in Windows Explorer. To have preview of a given file, it must be opened in BIM Vision first. Previews are generated automatically and are available on computer on which the files was opened.

User interface

Plugin installs in system preview handler. When you select an IFC file, it displays its preview in Windows Explorer preview pane.

When file has not been opened in BIM Vision yet:
